

## **June 15, 2011 Plan Commission & JEZC Hearing & Meeting**

### **Proposed Amendment to the Zoning Ordinance:**

#### **Predevelopment Agriculture**

For the purposes of the execution and enforcement of the Village of Spring Green Zoning Ordinance, "Predevelopment Agriculture" shall be defined as the use of land for agricultural purposes prior to final development. It is permitted in certain zoning districts as set forth by the plan commission (and JEZC as appropriate). No new agricultural structures may be erected in conjunction with this use. This use is intended to provide for constructive use of vacant lands zoned for development in whole or in part to help ensure the properties are properly maintained prior to final development.
