6. **Discussion and possible action regarding the operation/maintenance of the Recycling Center/Burn Area.** Robson stated, “I’ve been wondering about having people sign in to get an idea of where everything is coming from”. Reno informed everyone that he is willing to create a sign-in sheet for those using the facility. Robson commented “When the brush is burnt the ash removal costs are very expensive”. Reno explained that the ashes had not been removed for quite some time and that instead of filling a dumpster he is now loading the ash into a dump truck and transporting directly to save on cost. Those in attendance discussed options for the burn site to alleviate the expense of ash removal. The Town of Spring Green has a wood chipper, Reno and Evans will work together to try utilizing the chipper to see if it’s a viable option versus burning and paying for ash disposal. No action was necessary regarding the operation/maintenance of the Recycling Center/Burn Area.
